REPAIRS TO I-95 SOUTHBOUND ON-RAMP BRIDGES IN PORTSMOUTH
WILL REQUIRE SINGLE LANE TRAFFIC FOR UP TO THREE MONTHS

The New Hampshire Department of Transportation announces bridge repairs are scheduled to begin Tuesday, May 25, 2004 on the Interstate 95 southbound on-ramp bridges in Portsmouth.

This expansion joint repair work will take 10 to 12 weeks to complete and will require single lane traffic. Warning signs, barrels, concrete barriers, arrow boards and uniformed officers will help guide traffic through the work zone. Drivers using the I-95 southbound on-ramp in Portsmouth should proceed with caution. Minor delays should be expected.
